CHIN1-CHIN5* ; BULG1-BULG3* ; V80 ; VS5 ;
AUSB ; FLOT ; GRUP ; ?**

* Names generated by the authors, no official U-names.

- With "IT1-IT25" we mean "IT1" (gives output for UIT1), "IT2", "IT3" etc. up to "IT25".
- "F?" and "IT?" refer to records about respectively french and italian submarines that were captured but that were NOT commissioned into the Kriegsmarine. These boats didn't receive an ID-number in the "F" (the "UIT") Series of Uboat-identifications.
- YUG1 till YUG3 gives output for UYUG1 etc., boats for Yugoslavia.
- CHIN1 till CHIN5 gives output for boats for China.
- BULG1 till BULG3 gives output for boats for Bulgaria.
- "?" gives records for which we don't know (yet) the Uboats' number to enter. This concerns attacks by Allied escort vessels or aircraft on Uboats, attacks documented in Allied records that were assessed as definitely having been on a Uboat (and not, for instance, on a whale), but we couldn't yet identify the Uboat attacked. The number of records with Boat number="?" in the database is being steadily reduced.
- "AUSB" gives records about training flotillas and training commands.
(Still under construction and today only partly covered in the HMA-Project).
- "FLOTT" gives records about frontflotillas and their commands.
(Also still under construction and today only partly covered in the HMA-Project).
- "GRUPPE" gives records concerning whole Uboat groups. Not about individual Uboats within a Uboat group.
